

DEPARTMENT OF ZOOLOGY
FIELD TRIP REPORT

Aim and objectives:

1. Field trip is a part of the 6th Semester BSc Syllabus.
2. The Department organizes field trip every year to the 6th semester student to widen their knowledge and observe things that are not available in classroom.
3. Students are giving a chance to get direct and first-hand experience of what they learnt inside the classroom.
4. Students can study and perform experiments in the natural environment.

Field trip to Sikkim

Year: 2017

Number of students participated: 19

Objectives:

1. To study the topography and climate
2. To study the impact of climate change on snow cap mountains.
3. Students to submit the field trip report for evaluation.

Brief Report:

Students got first-hand experience about cold climate. They were able to observed and study the temperature of the place. Locals informed the students that many mountains that were previously covered with snow are now bare, showing the impact of global warming. Students were able to take photographs of some places which were letter discussed with the teachers in the hotel room. Thus, the students were able to observe and study the effect of global warming in the area.
