

**DEPARTMENT OF ZOOLOGY**  
**FIELD TRIP REPORT**

**Aim and objectives:**

1. Field trip is a part of the 6<sup>th</sup> Semester BSc Syllabus.
2. The Department organizes field trip every year to the 6<sup>th</sup> semester student to widen their knowledge and observe things that are not available in classroom.
3. Students are giving a chance to get direct and first-hand experience of what they learnt inside the classroom.
4. Students can study and perform experiments in the natural environment.

**Field trip to Shnongpdeng, Dawki**

**Year:** 2019

**Number of students participated:** 24

**Objectives:**

1. To study the water chemistry of Umngot river
2. To study sustainable development of the local people
3. Students to submit the field trip report for evaluation

**Brief Report:**

Water chemistry like temperature, pH, D.O, conductivity, alkalinity of the river water were analysed by the students in the field. Students were able to interact with the villagers and learnt about the sustainable used of the river by the villagers. Students record the area with photographic documentation which was later discussed with the teachers in the class. It is hoped that this trip would help the students gain more knowledge through first-hand experiences and develop a holistic life.
