

## **STUDY TOUR TAKEN BY EDUCATION DEPARTMENT, SHILLONG COLLEGE - 2019**

In 2019, the Department of Education, Shillong College also undertook an educational tour to Lawbah, about 15 kilometers away from Mawsynram, one of the wettest places on earth. The objective of the tour was to study the socio economic status of the people at Lawbah. It conducted an SES scale in Mawdon Mawkhan School. During interactions with the students it was learned that many children had high aspirations for further study and to achieve educational milestones but this was just a dream for most of them due to their poor socio-economic status. Indeed, there is a need to set up community colleges, community polytechnics or such higher educational institutions so that their aspirations can be fulfilled. The programme was followed by some inspirational talk by the teachers in the main hall of the School.

After the programme, the team visited one of the tourist spots at Lawbah which is a lake on a hill top. One cannot but wonder how a lake can exist atop a hill. This lake is utilized for boating, swimming and other such activities.
