

## **Report on Exposure Trip to Guwahati-15<sup>th</sup> April 2023**

An exposure trip to Guwahati was organized for BA 6<sup>th</sup> Semester students, Department of Political Science on the 15<sup>th</sup> of April 2023 to provide them with an opportunity to learn outside of the traditional classroom setting. The purpose of the trip was to expose the students to different cultures, lifestyles, and traditions and to broaden their understanding of the world.

During the trip, we visited several places of historical, cultural, and educational significance. We started our journey early in the morning and arrived in the city by midday. Our first stop was at the Brahmaputra River, which is a popular tourist attraction in the city and one of the biggest rivers in India. The trip to the Brahmaputra River was an enriching experience for the students. They learned a lot about the river's importance and the various ways in which it affects the lives of people living around it. They also got to appreciate the natural beauty of the area and witness some of the unique wildlife that inhabit the region. It is hoped that more educational trips such as this one can be organized in the future to promote environmental awareness and appreciation for the natural world. Later in the day students visited the Regional Science Center and the Planetarium. Students were thrilled to learn about the latest advancements in the field of science through educational talks and presentations that were made by the staff of the Science center.

Thus, the exposure trip was a valuable learning experience for the students, providing them with a deeper insight into different lifestyles, cultures, and traditions. The trip helped them develop empathy towards others and broaden their horizons. We believe that such trips play an important role in the holistic development of students and we look forward to organizing more such trips in the future.
